

Message from Faculty Coordinator

***Prof. Alok Kumar Mishra
Faculty Coordinator,
Placement Cell,
School of Economics,
University of Hyderabad
Faculty Coordinator, Placement Cell***

It is with great enthusiasm that I invite potential recruiters to engage with the School of Economics at the University of Hyderabad, recognized as an Institution of Eminence, for this year's internship season. Ranked within the 501-550 range in Economics and Econometrics by the QS World Rankings for 2024, our school holds a prominent position. The university is also highly regarded in India, featuring in the top ranks according to the NAAC survey, within the top 17 by the NIRF and ARII surveys, and among the top 800 globally by QS rankings. We are committed to the comprehensive development of our students, ensuring they are prepared for both academic and corporate success. Over the past decade, we have built strong relationships with industry partners and eagerly anticipate new collaborations with recruiters this season.

Our flagship postgraduate programs, MA Economics and MA Financial Economics, along with the Integrated Master's in Economics, are designed to meet industry needs. Students receive rigorous training in data analytics and gain proficiency in advanced statistical tools such as R-Studio, Tableau, Stata, Python, and Power BI, through specialized workshops. Moreover, workshops on soft skills and technical capabilities ensure that our students are well-equipped to face future challenges with confidence.

Our students have a solid foundation in both theoretical and quantitative economics and finance, supported by a balanced curriculum. Beyond the classroom, we foster skills in creative thinking, problem-solving, research, time management, project management, communication, and writing. Initiatives like Alumni and Corporate Talks have further strengthened our network with alumni from various sectors, offering students valuable exposure to different industries. This prepares them to excel in roles such as business analytics, market analytics, data analytics, data science, and investment analytics.

With this, I extend a warm invitation to all recruiters to participate in the 2024-25 placement season. We are excited about the prospect of you choosing from the outstanding talent our school has to offer.
